T-Foil is an all-in-one vapor barrier and insulation hanging system. This all-in-one system is installer friendly, does not compress insulation, allows for ventilation, packaged for easy transport and can be manufactured to suit your specific job requirements.

- Varying drop card sizes: 4” to 18”
- Allows for proper ventilation and air flow
- Vapor Barrier UL tested
- T-Foil is packed 5/30’ pieces per roll equaling 300 sq ft.
- This hanging system does not compress insulation
- Great for wooden structures
- T-Foil is available in White, Black or Foil Facing
- Manufactured in Vancouver, WA

What is T-Foil?
T-Foil Installation Requirements

- Always verify square foot requirements before ordering and order in 300 sf increments
- T-Foil can be ordered to handle up to R49 insulation material
- When stapling drop card to trusses, make sure to use a 508-C quality staple and staple every 5 inches
- When stapling bottom overlapping section, make sure to use ACE 70001 staples only
- When stapling bottom overlapping section, make sure vapor barrier is overlapped 1 inch and stapled every 4 inches
- Make sure to account for correct air space/ventilation requirements
- Make sure moisture content is not excessive when installing T-Foil
